CDJ-400

Let The Journey To Clubland Begin

The CDJ-400 is compact, fun and feature packed with forward thinking technology.

A multi-source digital deck with USB, MP3 and MIDI support, the CDJ-400 is totally geared up to serve the next generation of digital DJs. Navigating digital music is made easy by a Rotary Scroll Wheel working in conjunction with the main display. For accessing music, the deck allows DJs to use audio and MP3 files from CD-R/RW discs as well as music from external storage devices, such as USB keys. Compatibility via USB connection to Pioneer DJS* and third-party DJ software including Serato Scratch LIVE and Traktor**, without the need of a soundcard, helps drive top-class club performance home.

When it comes to performance, the CDJ-400's pressure-sensitive Jog Wheel is impeccably formed for hands-on control allowing real-time scratching.

The platter can be personalised with CDJ 'slip mats' and its perimeter illuminates to indicate state of play. The effects front is impressive too, boasting 3 Scratch Jog Effects (BUBBLE, TRANS and WAH), 3 Digital Jog Break Effects (JET, WAH and ROLL) and a Hold button with which to experiment. Building on this creative excursion into sound, the CDJ-400 lets DJs fashion faultless four-beat Beat Loops and Hot Loops, while the funky Beat Loop Divide buttons enable the rhythmic dissection of beats at will.

The super-versatile CDJ-400 deck is an ideal partner for Pioneer's DJM-400 mixer and together they present the ultimate home/house party set-up – where the journey to clubland begins.

*From February '08 when new DJS software update issued

**From late February when Serato and Traktor issue software updates

Typical Configuration

2 x CDJ-400s + DJM-400 + DJS + HDJ-1000

Additional Functions

- » Tempo range settings available: ± 6 , ± 10 , ± 16 and WIDE. (WIDE/ ± 100 mode is unavailable with MP3 files.)
- » Resume function – restarts playback of a disc from the point at which it was most recently ejected.
- » Digital Output – connect to Pioneer's range of digital DJM mixers or other studio equipment.
- » Text Mode – displays CD-TEXT and ID3 tag information.
- » Reverse play – instant reverse play.
- » Shockproof Memory and Pioneer Oil Damper Float construction.
- » High-quality dot matrix display.
